

CDC Forecasts Up to 100,000 More COVID-19 Deaths in the Next Few Weeks

FREE Face Shields Now Available

The number of COVID-19 cases is rising daily, and the new strain is even easier to catch. For maximum protection use a mask AND a face shield to keep peoples' spray out of your eyes and off your skin. The IX Power Foundation has teamed with Table Mountain Innovation to provide FREE, high-quality, reusable, NEW, unused face shields. Table Mountain Innovation CEO Chris Crowley is modeling one of the face shields below - worn the correct way WITH a mask. Learn more about this free face shield giveaway by visiting:

The face shields are available to non-profits, community organizations, health organizations, medical facilities, retirement and nursing facilities, homeless shelters, government and police entities, and the like. Organizations may request from a dozen up to 2,000 at a time. Their request will be fulfilled based on the amount of community response. Private industry and local for-profit businesses may get on a waiting list to receive shields in February if there are any remaining.

“We are so pleased to be able to team with Table Mountain Innovation to make this important PPE (personal protective equipment) available to our community,” said Deborah Deal Blackwell, CEO of the IX Power Foundation. “We must all be extra vigilant at this time while we wait for widespread distribution of the COVID-19 vaccine, and especially now that the progress of the new strain of the virus is uncertain.
